

## Stage „And now? (Und jetzt?)“

First pipe for spotlight over edge of stage.  
In large houses 45 degrees on machine and first front tower.

Second pipe for spotlights approx. 2m behind stage edge.  
45 degrees on small tower.

### Minimum stage dimensions !!!:

Width min. 5.50m, Depth min. 5.50m or larger, Clearance height min. 3m

**Normal stage dimensions:** 6-7m wide, 6-7m deep, after that approx. 2-3m to the first sitting row.

Either rising sitting rows or stage platform high 0.40-0.80m

Black stage (or dark - please contact me)

Stage platform, if used, at least 6m deep and 6m wide or larger, bolted down tight!

2x16A/220V sound and light separately, on the right side of the stage (in small rooms also 1x16A possible)

Dark room!

Max. 500 audiences, depending on conditions more possible - please contact me.

Seating in tiers possible by arrangement.

**Attention:** We have to fix the towers with 6 small screws. If this is not possible, please contact me.

We bring all the technology (light desk, light and sound) for our stage, but we also control the hall light and the front spotlights of your house. For this we need your DMX cable on the right side of the stage. (2 DMX universes possible)

Front lights: Either 3x PC with barndoor and 4 profilers (plus 2x Fresnel applause light)

Duration approx. 80 minutes without break

Helpers for unloading and loading

1 free parking space at the theatre and at the hotel for van Mercedes Vito

Set-up of the stage approx. 5h -7h

Dismantling minimum 2h

During dismantling, no work can be done on the stage until the stage is free!

### Attention!

Please deactivate smoke detectors. A hazer is in use

## Lighting plan "And now?"

Spotlight positions (angle is important!)

We bring our own lighting console and sound system.

If available please provide an active subwoofer. Please bring 5 pole DMX cable on stage left + 2x 16A
